1. OUR PRODUCTS:

1.1 APPLICATION SERIOUS IN THE FIELD OF HYDROGEN ENERGY

1.1.1 Suitable for 35Mpa hydrogen refueling station (external hydrogen supply) diaphragm compressor

Technical Parameters:

- ◆ Capacity: 20~3000Nm³/h (Exhaust volume)
- ◆ Suction pressure: 5.0~20.0Mpa(G)
- ◆ Exhaust pressure: 45.0Mpa(G)
- ◆ Power: 15~220KW

Characteristic:

- ◆ Wide range of intake pressure, suitable for hydrogen refueling stations without hydrogen production;
- ◆ Compressor integrated system is perfect, all interfaces are arranged uniformly, easy to install;
- ◆ The cooling system is perfect to ensure the performance and life of the compressor;
- ◆ The hydraulic system of the compressor uses an automatic regulating valve, which consumes little power and is energy saving and environmentally friendly;
- ◆ Automatic unloading, automatic start and stop for remote control;
- ◆ Reasonable speed, stable compressor operation and low noise;
- ◆ Equipped with lifting device for easy compressor maintenance.

1.1.2 Suitable for 70Mpa hydrogenation station (external hydrogen supply) diaphragm compressor

Technical Parameters:

- ◆ Capacity: 25~2500Nm³/h (Exhaust volume)
- ◆ Suction pressure: 10.0~45.0Mpa(G)
- ◆ Exhaust pressure: 100.0Mpa(G)
- ◆ Power: 22.0~220KW

Characteristic:

- ◆ Wide range of intake pressure, suitable for hydrogen refueling stations without hydrogen production;
- ◆ The cooling system is perfect to ensure the performance and life of the compressor;
- ◆ The compressor hydraulic system uses an automatic regulating valve, which consumes little energy and is energy-saving and environmentally friendly;
- ◆ Automatic unloading, automatic start and stop for remote control;
- ◆ Reasonable speed, stable compressor operation and low noise.

1.1.3 Suitable for 35Mpa hydrogenation station (external hydrogen supply) diaphragm compressor

Technical Parameters:

- ◆ Capacity: 60~620Nm³/h (Exhaust volume)
- ◆ Suction pressure: 0.1~0.6Mpa(G)
- ◆ Discharge pressure: 45.0Mpa(G)
- ◆ Power: 37~185KW

Characteristic:

- ◆ Low intake pressure, high exhaust pressure, three-stage compression, suitable for hydrogen production with low outlet pressure
- ◆ The compressor integrated system is perfect, the explosion-proof control cabinet, the explosion-proof chiller and the compressor are installed on the same armored chassis, which is easy to operate;
- ◆ Self-contained cooling system, perfect insulation protection to ensure the performance and life of the compressor;
- ◆ The hydraulic system of the compressor uses an automatic regulating valve, which consumes little power and is energy-saving and environmentally friendly;
- ◆ Automatic unloading, automatic start and stop for remote control;
- ◆ The largest displacement compressor with three-stage compression from low pressure to high pressure in China.

1.1.4 Suitable for 22Mpa hydrogenation station (external hydrogen supply) diaphragm compressor

Technical Parameters:

- ◆ Capacity: 65~1000Nm³/h (Exhaust volume)
- ◆ Intake pressure: 0.7~2.0Mpa(G)
- ◆ Discharge pressure: 22.0Mpa(G)
- ◆ Powder: 37~185KW

Characteristic:

- ◆ For dynamic balance structure, low vibration, and low noise;
- ◆ The compressor hydraulic system uses an automatic regulating valve, which consumes little energy and is energy-saving and environmentally friendly;
- ◆ Automatic unloading, automatic start and stop for remote control;
- ◆ Compressor number is reasonable, oil pressure is stable, equipment is more reliable and stable;
- ◆ The cavity design is optimized and the diaphragm life is high.

1.2 GENERAL FIELD APPLICATION PRODUCT SERIES

D044 series diaphragm compressor

- ◆ Includes single stage Z, type and two stage
- ◆ compression L type
- ◆ Pressure up to 100Mpa
- ◆ Flow varies with intake pressure

- ◆ Powder up to 2.2KW

D060 series diaphragm compressor

- ◆ Including single Z L type and two stage compression L type
- ◆ Pressure up to 120MP
- ◆ Flow varies with intake pressure
- ◆ Power up to 4.0kW

D070 series diaphragm compressor

- ◆ Includes single-stage Z, L-type, and two-stage compression L, W, and three-stage W
- ◆ Pressure up to 120MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 5.5kW

D095 series diaphragm compressor

- ◆ Includes single stage Z, L, V and two stages of compression L, V type
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 7.5 kW

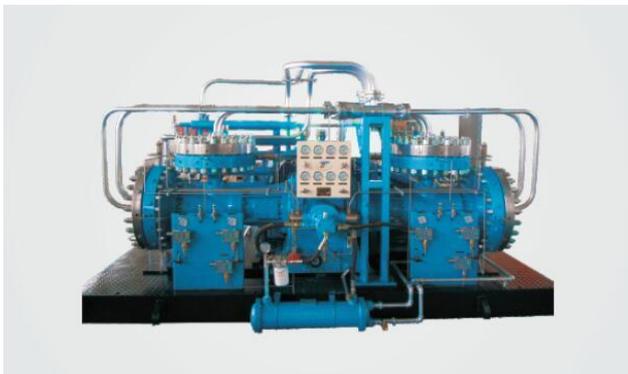

D105 series diaphragm compressor

- ◆ Including single-stage Z, L, V and two-stage compression L, V type
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 18.5kW

D130 series diaphragm compressor

- ◆ Includes single stage Z, L and two stage compression L type and three stage L type
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 55Kw

2D130 series diaphragm compressor

- ◆ Includes single-stage four-film head H-type and two-stage compression four-film head H-type
- ◆ Pressure up to 25MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 90Kw

D165 series diaphragm compressor

- ◆ Includes single stage Z, L type and two stage compression L type
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 90Kw

D185 series diaphragm compressor

- ◆ Includes single stage H type and two or three stage compression type H
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 185Kw

D188H series diaphragm compressor

- ◆ Includes single stage H type and two or three stage compression type H
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 220Kw

D1812H series diaphragm compressor

- ◆ Includes single stage H type and two or three stage compression type H
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 250Kw

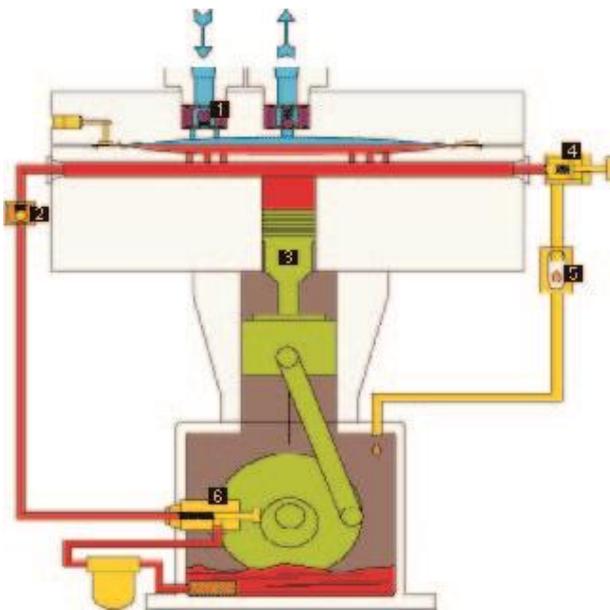

D210H series diaphragm compressor

- ◆ Including single-stage Z, L, V and two-stage compression L, V type
- ◆ Pressure up to 150MPa
- ◆ Flow varies with intake pressure
- ◆ Power up to 280Kw

2. WORKING PRINCIPLE:

The diaphragm compressor is a special type of positive displacement compressor. It uses a diaphragm to separate the compressed medium from the oil. Due to its special structure, the compressed medium does not contact any

lubricant. The cylinder does not need lubrication, and the sealing performance. Very good, so it is suitable for compressing and conveying high purity gas, rare gas, corrosive gas, and radioactive, toxic, and explosive gas. The compressor is made up of the following main assemblies: crankcase, crankshaft and connection rods, cylinder body, movement transmission parts, gas and oil waterway system and some other accessories. The power of the compressor is transferred from the motor to the host. The diaphragm completely separates the cylinder from the cylinder. The diaphragm itself vibrates and acts as a piston.

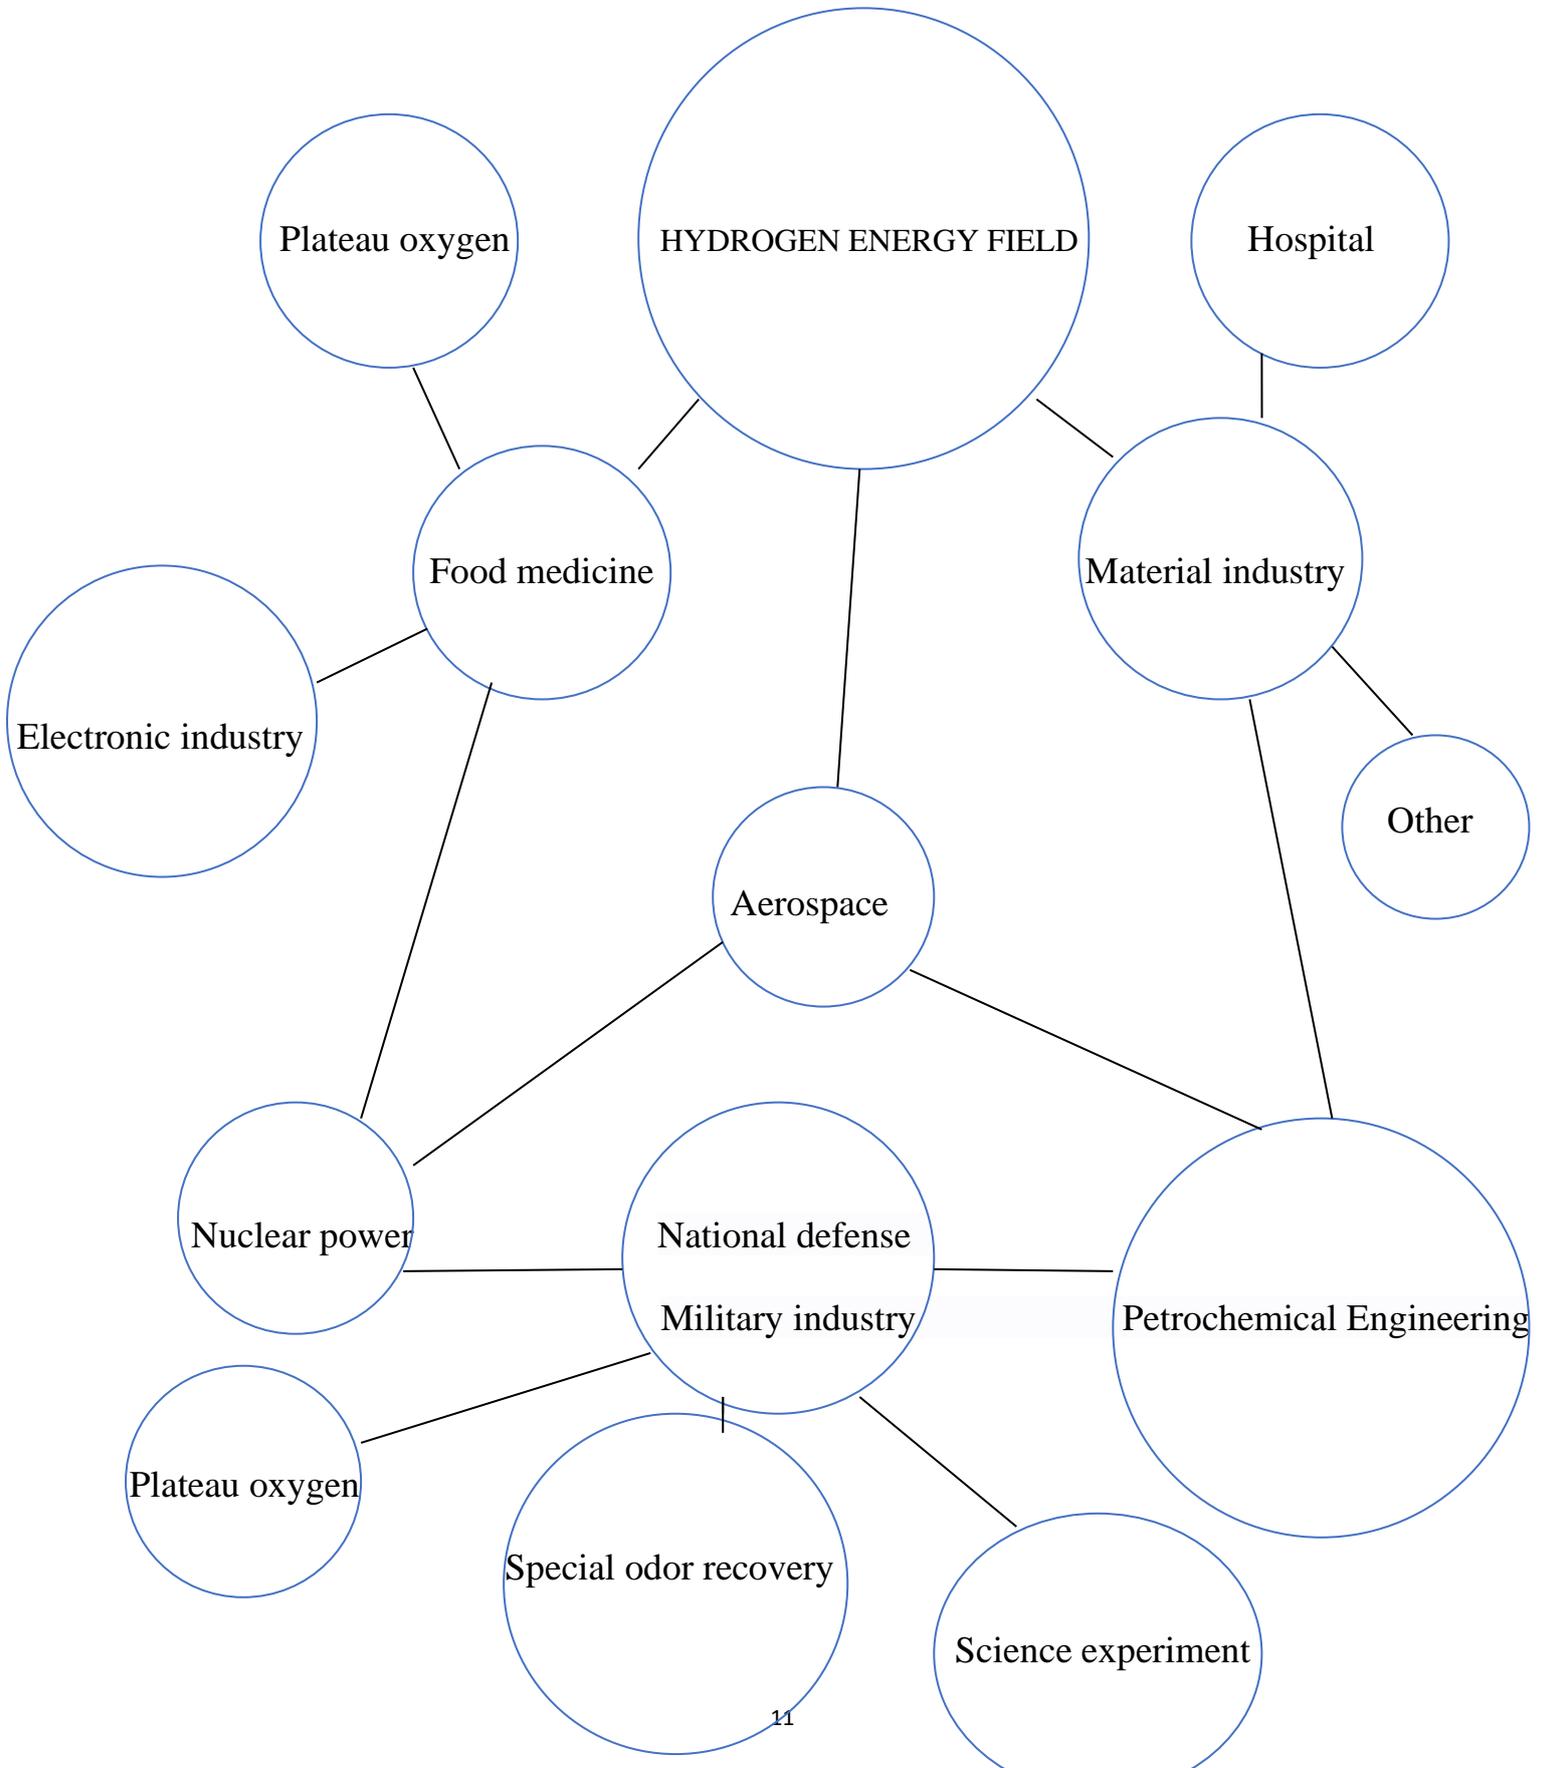

3. PRODUCT FEATURES:

1. High Compression Efficiency Optimal Design of Membrane Convex Curve
2. Good sealing performance Compressed medium high purity medium sealed under static condition, media completely separated
3. Large compression ratio large area of compression cavity
4. Reliable 、 life high 、 safety install high efficiency oil filter use of pressure oil replenishment and reliable alarm system
5. Energy saving good cooling conditions complete cooling after compression
6. Easy to maintain and operate using unmatched pan structure and advanced hydraulic valve

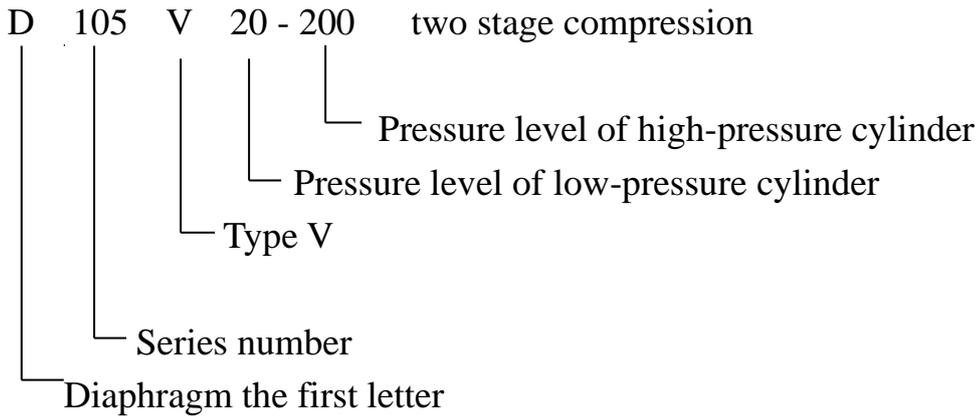

4. PRODUCT APPLICATION

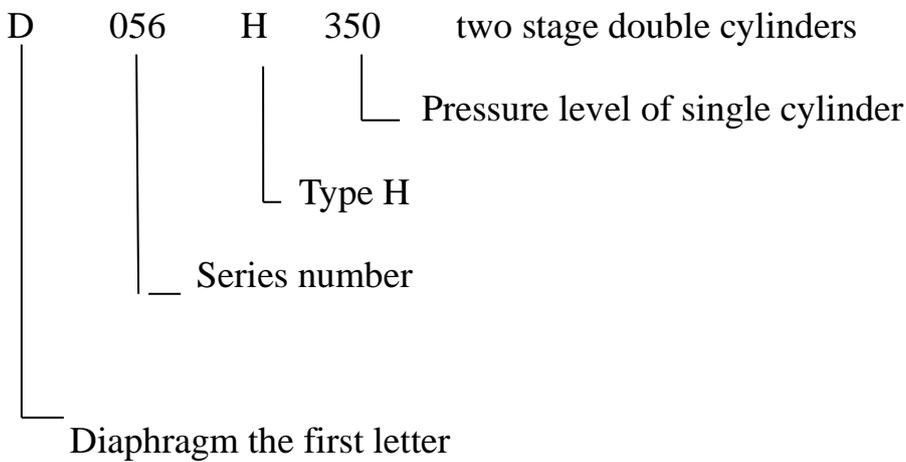

5. PRODUCT MODEL DESCRIPTION

Example 1: D105V20-200

Example 2: D056H350

6. PRODUCT SERIES

6.1 APPLICANT SERIES IN THE FIELD OF HYFROGEN ENERGY

7. AFTER-SALE WARRANTY

Our company provides spare parts and after-sales service for the lifelong and timely products. The product implements three guarantees (i.e., return, replacement, repair), the whole machine is guaranteed for one year, and any manufacturing, design, production, etc. are caused during the warranty period. The quality problem is repaired by our company and the parts are replaced without compensation. According to the needs of users, after the equipment is in place, our company will send experienced technical and technical personnel to carry technical information and drawings to the site for guidance installation, and commissioning, provide technical training and after-sales service for users, and timely solve the problems in operation. Ensure the normal operation of the equipment.
